Academic & Extracurricular Highlights:

- Not Bread Alone Soup Kitchen Volunteer
- Kidney Disease Screening & Awareness Program
- Amherst Varsity Softball
- Charles Drew Pre-Health Society
- Amherst Outing Club
- Amherst College Emergency Medical Services
- Athletics Operations Employment

I am honored and grateful to have been selected for the 2025 MPA scholarship. I value and respect the volunteers, board of directors, and staff who work behind the scenes to make the foundation possible. Moreover, I deeply appreciate the donors whose generosity makes this opportunity possible. Thank you for supporting this meaningful organization and investing in students like me.

This scholarship is a significant contribution to my academic journey and long-term professional goals. Lessening the financial burden of higher education enables me to focus more fully on my studies, growth, and preparation for a career in medicine. As a pre-med student majoring in neuroscience, I am passionate about exploring the complex connections between the brain, behavior, and overall health. I look forward to ultimately applying this knowledge in clinical practice.

My father's 20 years of service as a naval aviator instilled in me the values of honor, courage, commitment, and service to something greater than oneself. These principles continue to guide my path. I am committed to carrying forward his legacy, not only in my personal life, but also in a future career dedicated to making a lasting impact in the world.
