Receiving this 2027 WOASF scholarship opens an abundance of opportunities for me in this next school year. I am able to focus on volunteering at my church, shadowing doctors and staying focused on my academics and athletics. This scholarship gives me the blessing of not having to work during the semester in order to pay for college. Not having to work allows me to continue to build relationships with professors and colleagues. I am able to go to networking events for my major and build up my resume for medical school. For my sport, this scholarship allows me to get proper treatment and stay healthy for peak performance. This blessing will give me the ability to give back to others, not only through my church, but other volunteer opportunities that come up along the way. I am able to keep some of my days open and say yes to spontaneous things as well. So, thank you to all who donate and make this dream college experience a possibility for me.
