- TeenPact Conference, Annapolis, MD.

It is a great honor, privilege, and blessing to receive a 2026-2027 Wings Over America scholarship. I see this award as affirming my chosen path and encouraging my future service to my country.

I began serving my local community as a volunteer counselor at a discipleship camp and as a ministry lead at my church while engaging in various other events and activities that supported neighbors and families in need. In the future, I hope to carry on my family's three-generation tradition of service to the country by serving as a pilot in the United States Armed Forces or as an engineer in government or industry. The Wings Over America scholarship will give me a welcome boost as I embark on my next journey at The Pennsylvania State University pursuing a degree in Mechanical Engineering. I look forward to applying my technical training and commitment to service as I discover what the Lord has for my life.

I am immensely grateful to the donors and staff at Wings Over America for their support of veterans and their families. Thank you for all that you do and for your support of my father and my future.
