Receiving the 2027 WOSAF scholarship has opened up an opportunity for me to pursue my high school education in new ways that were not previously open to me. Since my sophomore year of high school, I have been enrolled with Southeastern University through a concurrent enrollment program; through that program I have been able to acquire college credits for the coursework I do through Homeschooling. The 2027 WOSAF scholarship has given me the opportunity for me to pursue a General Education AA through CC+. This scholarship has more than covered the tuition needed to fulfill the credit requirements and for that my family and I are eternally grateful. I would like to thank my family for supporting and teaching me all these years, and WOSAF for funding the next step of my undergraduate education.
