2 Circle Inc Scholar

Tyler Frostad

Virginia Beach, VA

Sponsor: CDR Eric Frostad

College: Old Dominion University

2026-2027: Senior

Major: Mechanical Engineering

Academic & Extracurricular Highlights:

- Events Coordinator, American Society of Mechanical Engineers
- Design, Build, Fly Team Member, American Institute of Aeronautics and Astronautics (AIAA)
- ODU Surf Club Student Member
- ODU Engineering Ambassadors Student Member
- Adopt A Spot ODU
- Holy Family Volunteer

Receiving a 2026 Wings Over America Scholarship is something I am very thankful for, especially because it marks another step in my college journey. Since last year, I have had the chance to grow through harder engineering courses, new campus involvement, and experiences that have helped me better understand the direction I want to take after graduation.

At Old Dominion University, I am continuing to pursue my degree in mechanical engineering, and this past year has pushed me to become more disciplined, confident, and focused on my future. Outside the classroom, I have become more involved through ASME, Engineering Ambassadors, honor societies, and the ODU Surf Club. These experiences have helped me meet other driven students, take on more responsibility, and become more connected to the ODU community. They have also made my college experience more meaningful while continuing to strengthen my interest in aviation, defense, and mechanical design.

I am grateful to WOASF and its donors for continuing to support my education. Receiving this scholarship again reminds me that the effort I have put in over the past year is paying off. It also motivates me to keep improving, stay focused on my goals, and continue working toward a future where I can use my engineering background in a meaningful way.
