

## Ross & Deidre Myers Scholar

**Daniel Ulrich**

Leonardtown, Maryland

Sponsor: LCDR Peter Ulrich

College: Boston University

2025-2026: Senior

Major: Mechanical Engineering, Technology Innovation

Academic & Extracurricular Highlights:

- Terrier Ride Engineering Club, Founder
- Universal Creative Intern
- Ride Engineer Intern - Zamperla, INC
- Mechanical Engineer Intern – Physical Sciences Inc.
- Haunt Comp Project *Plague: Unearthed*
- Photography & Roller Coaster Design

I'd like to offer my continued thanks to the scholarship committee and to the donors that have granted me a 2025 Wings Over America scholarship. Your support has been instrumental in my academic and personal journey over the past three years. My junior level engineering classes have started providing me with more hands-on projects that build on the foundational knowledge I have acquired and allow me to creatively think in a technical field, reminding me why I am so passionate about engineering. In my limited free time, I have had the incredible opportunity to found a club at Boston University dedicated to showcasing the variety of careers in the themed entertainment industry. I am currently the proud president of the Terrier Ride Engineering Club, which took home fifth place in a national competition for theme park ride engineering this spring. As a future roller coaster engineer myself, I look forward to growing our club community in the fall and bringing back lessons from my upcoming summer internship with Universal Creative in Florida. I am so appreciative of the WOASF for investing in my future, and I can't thank you enough for your continued support.
