Major: Computer Science

Academic & Extracurricular Highlights:

- Civil Air Patrol Squadron
- CyberPatriot Captain
- Cyberspace Advanced Administration Course, Air Force Academy
- Whidbey Community Choir
- Summer Landscaper

I am incredibly grateful to the Theodore Roosevelt Association and its sponsors for selecting me as a scholarship recipient for the 2026-2027 academic year. It is often said that children in military families have to say goodbye to more people by the time they are 18 than some people will in their entire life, however I look at this as a gift of being able to get to know many interesting people. I've been lucky enough to live on both coasts, from Florida to Washington to Virginia to California. I've been in every contiguous US state, attended three different high schools, and been a part of many different communities across nine moves. I have worked hard to excel academically and to always improve the local community through direct individual action, fundraising, urban cleanup, and development of arts among youth and other community organizations. I have been working on earning money for college through a part-time job and these scholarships represent several months of work, which will allow me to focus on academics as I embark on the next step of my college career. Thank you again for this tremendous opportunity.
