The Wings of America Scholarship is a huge blessing. The scholarship has opened doors of opportunity to further my education but also my desire to help the world. Through the foundation's generosity, I will now be able to attend college knowing my financial aid has been lessened. But even more than that, I am honored that this is from the military community. The military has played an incredible role in my life. Growing up throughout the country, I have watched my parents work tirelessly to support this country. I am so grateful for all of the time and energy poured into our country. And now I am still being supported by this community of heroes. The scholarship is furthering my opportunity for growth, to go forward and serve my own community in new ways. I am so grateful for the Wings of America Scholarship Foundation which through their generosity is encouraging the next generation.
